Summary

Full Stack Software Engineer with 5+ years shipping products end to end: NestJS and PostgreSQL on the backend, React/Next.js on the frontend, deployed on AWS and GCP. I built a generative AI platform for education from scratch, developed the recurring billing engine of a subscription platform, and took part in migrating a monolith to domain-based microservices at an insurtech handling peaks of 100,000 users/minute. I apply Clean Architecture with unit tests on use cases.

Skills

Backend: TypeScript, Node.js, NestJS, Python, REST, GraphQL, Go (personal projects)
Frontend / mobile: React, Next.js, React Native (Expo), Angular, Ionic
Data: PostgreSQL, Supabase, Prisma, MySQL, DynamoDB, Firestore, Redis
Cloud / DevOps: AWS (Lambda, API Gateway, SNS/SQS), GCP (Cloud Run, Cloud Functions, Pub/Sub), Docker, Terraform, GitHub Actions
Architecture: Clean/Hexagonal Architecture, DDD, microservices, events, monorepos
Quality: Jest, unit tests on use cases, code review, Scrum/Kanban
AI: OpenAI, Gemini, Ollama, LangChain, N8N; AI-assisted development with Claude Code
Languages: Spanish (native), English (intermediate, B1)

Experience

Senior Full Stack Developer · **Rumbo** (client: Yoki, Jockey Plaza) — Feb 2026 – Sep 2026 · Remote

- Built end-to-end features for Yoki's subscription platform, from the Next.js interface to the NestJS services.
- Designed and implemented the recurring subscription billing engine, integrating payment gateways and automating billing states in PostgreSQL.

Senior Software Engineer · **Nomed** (EdTech startup) — May 2025 – Feb 2026 · Remote

- Built Nomed Teach from idea to production: an AI platform for teachers that generates quizzes, flashcards, games and educational chatbots from a topic, text, URL or file.
- Developed backend (NestJS) and frontend (Next.js) in a Clean Architecture monorepo, integrating OpenAI, Gemini and Ollama via LangChain and N8N workflows.

Software Engineer · **Betterfly** (insurtech, Chile) — Apr 2022 – Mar 2025 · Remote

- Took part in the product's evolution: backend from a Django monolith to domain-based NestJS microservices (DDD), and mobile apps from native to Flutter, integrating SDKs for user sign-up.
- Built and maintained event-driven services on GCP and AWS (Pub/Sub, SNS/SQS) with high availability at peaks of 100,000 users/minute.
- Automated support workflows with AWS Lambda and SNS/SQS, raising CSAT to 80% and cutting support load by 40%.
- Built Intercom integrations with Salesforce and HubSpot; Intercom later adopted these tools into its own product.

Full Stack Developer · **Kunder** (consultancy, Chile) — Apr 2021 – Apr 2022 · Remote

- Built Banco Ripley Chile's PWA with Angular and Ionic, plus Python services backed by SQL and Firestore.
- Implemented CI/CD pipelines with Jenkins for the same client.

Personal projects

- **Chapa** (landing-finance.kedein.com): Personal finance app for Peru that records Yape and Plin payments by forwarding the alert email. React Native, NestJS, Prisma, PostgreSQL, Cloud Run.
- **Online Radio** (rradio.online): Next.js + Expo monorepo sharing code between web and mobile; Go backend on Cloud Run and Supabase.
- **Medical Appointment Scheduling** (github.com/kedeinroga/medical-appointment-scheduling): Serverless system on AWS (Lambda, SNS, SQS, EventBridge, DynamoDB, RDS), hexagonal architecture, Jest tests.

Education

M.Sc. in Data Science, UNI, Lima, Peru — 2026 – in progress
B.Sc. in Electronic Engineering, UNI, Lima, Peru — 2013 – 2019
Full Stack Web Development Bootcamp, Codeable, Peru — 2020 – 2021

Awards: 2nd place, Betterfly AI Hackathon 2023 (GPT-powered benefits search) · 3rd place, Socialab HR21 Hackathon.
